

NTK | Fentanyl Test Kit

The SwabTek Fentanyl Test Kit is a single-use spot-test designed for use in screening for FENTANYL and a number of MAJOR FENTANYL ANALOGUES in any sample, or on any surface. The test is capable of identifying the presumed presence of fentanyl in very small quantities, with a level of detection as little as 3 µg in mass for certain fentanyl varieties. Based on third-party validation, the test is verified to test for the following:

- Fentanyl Hydrochloride
- Methoxyacetyl Fentanyl HCl
- Fentanyl Citrate
- Furanyl Fentanyl HCl
- 2-fluoro-ortho Fentanyl
- Carfentanil HCl
- Lofentanil HCl
- Remifentanil Oxalate
- Sufentanil Oxalate

SwabTek's unique form-factor helps to ensure proper sample collection and reduces the user's risk of exposure during testing.
